

## REPLACEMENT PARAGRAPH PAGE 10, LINES 14 TO 19

The thlrd beam path ~~44~~ 15 for the second working laser beam 16 is aligned with a second beam entrance 26 of the housing 22. The second working laser beam 16 impinges on a deflection mirror 22 from where it is deflected perpendicularly to the longitudinal axis 11 and impinges on a reflector surface 20' of a reflector plate 20 which reflects the second working laser beam ~~47~~ 16 again at a right angle, i.e., into a fourth beam path 33.
